

REPORT FROM SECOND REFERENCE GROUP MEETING

Quantum Mechanics II TFY4205 - AUTUMN 2020

Present : Therese Paulsen, Andreas Rosnes, Jacob Linder

Date : October 13th, 2020

The following points were raised by the class :

1. The students seem overall content with the elements of the course. The questions posed/tasks given to the class and accompanying discussion works well for promoting learning.
2. Sometimes the lectures last slightly longer than Panopto records, thus cutting off the last minute of the lecture or so.
3. The teaching assistant does a great job.
4. It could be helpful if the lecturer slows down the pace a little bit when there are derivations with big analytical expressions on the blackboard.

The response from the lecturer is as follows :

1. That is great to hear.
2. Thanks for pointing this out – I will do my best to end all lectures before Panopto stops recording.
3. I have conveyed this to the teaching assistant and she was happy to hear it.
4. I will keep this in mind.
