

Reference group meeting – summary

30.10.2014

These are the points discussed in the meeting:

- More tidy notes and handwriting would be good
- space on the blackboard could be used more efficiently so that the board does not have to be cleaned that frequently and there is more time to copy the notes
- The content is well-structured
- Exercises are useful if they are done at home before
- The numerical assignment is a good concept and stimulates the interest for the subject (= makes a lot of fun!)
- All in all, the class is satisfied
