— What We Do —

INNOVATIVE TECHNOLOGY SOLUTIONS

STRATEGY OVERVIEW

[Print](#)

A health worker tests a child for Human African Trypanosomiasis (HAT) in Bangumi village, Democratic Republic of the Congo.

OUR GOAL: to identify emerging technologies that have potentially transformative applications for global health.

Intensive Care Unit

Kun «spot check» monitoring

Problem

Periodiske målinger av vitaler hos sykehuspasienter er viktige for å plukke opp alvorlige helsetilstander.

Målingene i dag skjer manuelt og sykepleiere har for mange pasienter og for liten tid til å måle pasienter ofte nok.

Dagens løsninger for kontinuerlig måling er for dyre og mangler funksjonalitet til å vise legen historiske målinger.
