## **ADCHEM 2006**

The ADCHEM 2006 (International Symposium on Advanced Control of Chemical Processes) was held in Gramado, Brazil from April 2 to 5, 2006 and was organized under the auspices of International Federation of Automatic Control (IFAC) and Brazilian Society for Automation (SBA). The ADCHEM is a continuing series of international symposia held most recently in Hong Kong, China (2003/2004), in Pisa, Italy (2000), Banff, Canada (1997), Kyoto, Japan (1994), and Toulouse, France (1991). These meetings focus on advances in methods for modeling and control for all types of chemical processes. They are part of a three year rotation of IFAC meetings, which also include the IFAC DYCOPS Symposium Series (recently held in Boston, USA) and the IFAC World Congress.

**Copyright Conditions:** The material submitted for presentation at an IFAC meeting (Congress, Symposium, Conference, Workshop) must be original, not published or being considered elsewhere. All papers accepted for presentation will appear in the Preprints of the meeting and will be distributed to the participants. Papers duly presented at the Congress, Symposia and Conferences will be archived and offered for sale, in the form of Proceedings, by Elsevier Ltd, Oxford, UK.
