Disparity in Female Faculty Hiring and Retention Across Science Disciplines Dr. Donna J Nelson, University of Oklahoma, Department of Chemistry,Norman, OK 73072 Phone: 405-325-2288; Email: djnelson@ou.edu http://cheminfo.chem.ou.edu/faculty/djn/djn.html

We have determined the representation of females and underrepresented minorities (URMs) among tenured and tenure track faculty at the "top 50" departments in 14 science and engineering disciplines by surveying department chairs. Our surveys provided the first data disaggregated by race, by gender, and by rank, comparable over a number of science disciplines. They reveal that underrepresented groups in different science disciplines do not face the same challenges, and so the sciences should not be regarded as one group when formulating solutions. However, similarities among sciences reveal patterns, which should reduce the enormity of the problem and yet enable targeted strategies.
