Correction to “Systematic Design of Active Constraint Switching Using Classical Advanced Control Structures”

Adriana Reyes-Lúa and Sigurd Skogestad

Ind. Eng. Chem. Res. 2020, 59 (6), 2229–2241, DOI: 10.1021/acs.iecr.9b04511

Page 2240. In the published version of this paper, with regard to Figure 21, there is a missing dashed line going from the SRC block (signal 3) to the min selector block that gives the set point to the inlet flow controller (FC). The correct figure should appear as follows:

Figure 21. Alternative control structure for distillation column (all regions). This structure behaves differently from that in Figure 18 when maximizing throughput (region IV).
